

Interim Report 1 January - 30 June 2001

**Company result after financial items was
SEK -0.4 million (SEK 6.8 million)**

Continued high capacity utilization (78.2 %)

Strong growth in Bioinformatics (49 %)

- Turnover* for the first half was SEK 129.0 million (SEK 109.6 million), up 18 %. Operating profit before goodwill amortization was SEK 2.0 million (SEK 11.6 million), a 1.6 % (10.6 %) margin. Loss after financial items was SEK -0.4 million (SEK 6.8 million), a -0.3 % (6.2 %) margin.
- The result was charged with SEK 4.6 million for cost variances in fixed-price projects and SEK 3.2 million in development projects.
- Turnover* for Q2 was SEK 61.1 million (SEK 57.9 million), up 6 %. Operating loss before goodwill amortization was SEK 4.2 million (SEK +4.4 million), a -6.9 % (7.5 %) margin. Loss after financial items was SEK 5.4 million (SEK +4.5 million), a -8.9 % (7.8 %) margin.
- Positive cash flow SEK 1.2 million in Q2, despite the repayment of interest-bearing loans of SEK 5.4 million.
- Earnings per share after tax were SEK -0.13 (SEK -0.01). Earnings per share after standard tax were SEK -0.05 (SEK 0.65).
- Equity totalled SEK 85.4 million (SEK 84.5 million) at the end of the period, representing an equity/assets ratio of 62.9 % (53.8 %).
- The Bioinformatics business area's growth was 49 % during the period. The investment in the Bioframe development platform and the start-up in Denmark continued according to plan. A local organization is expected to be in place in October.
- The Telecom business area launched a product concept for streaming media, Streaming in a box during the period. The development project was completed and the concept has generated great interest from the market.
- Framework agreements or cooperation agreements were signed with ABB, Atlas Copco, Bombardier, Ericsson, Flextronics, Nokia and Sandvik.
- Capacity utilization was 78.2 % during the period (in June 79.2 %).

** The turnover figure for last year is excluding the subsidiary Prevas Engineering, which was sold to ABB on 1 July 2000.*

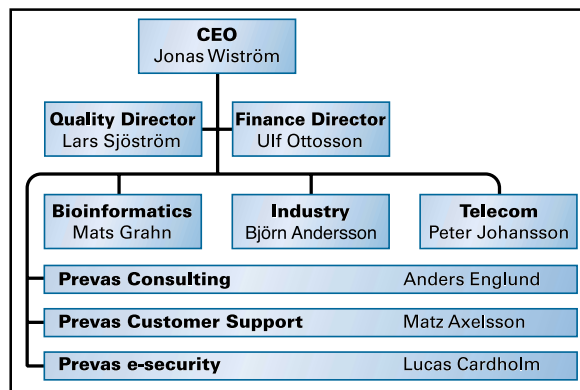

Prevas in brief

Prevas AB has offices in Stockholm, Gothenburg, Gävle, Karlstad, Linköping, Malmö, Uppsala and Västerås.

Customers include ABB, Amersham Pharmacia Biotech, AstraZeneca, Atlas Copco, Biacore, Electrolux, Ericsson, Gyros, MTH, Nokia, Personal Chemistry, Pharmacia, Pyro Sequencing, Rymdbolaget, Saab, Sandvik, Sign On, Sveriges Television and Volvo.

Delivery reliability, quality and fixed price are characteristic of Prevas' solutions.

Organizational structure

Operations 1 January - 30 Juni 2001

Prevas' strategy for increased growth and profitability may be summarized in three main points:

- Focusing operations on strong growth markets.
- Climbing the value chain. Delivering more unique competence and solutions and less pure resource consultancy to our customers.
- Strengthening our brand and targeting international markets.

Our development projects aim to strengthen our competitiveness and increase our structural capital. These are decisive factors for success on a declining market, which is increasingly demanding unique competence in well-defined niches.

During the first half, we completed our development projects and our plan for a start-up in Denmark despite the change in the market picture.

The start-up in Denmark is intended to utilize Prevas' unique competence in Bioinformatics on the fast-growing market in Medicon Valley.

Growth and profitability

Q2 was generally characterized by declining demand, which led to price pressure and fewer orders for consultancy assignments.

Growth during the first half was 18 % (31 %). As a consequence of the downturn in the market, growth fell to 6 % (37 %) during Q2.

Profitability was worse than the company's own expectations, mainly due to a provision for cost variances in some major fixed-price projects. The result was charged with provisions of SEK 4.6 million during the period.

The deterioration in the market situation, combined with the company's investments for the future mainly in Bioinformatics and Telecom, resulted in a slight deterioration in the invoicing rate. The invoicing rate, measured as hours invoiced divided by the total hours

worked in the company, fell by 1.5 % from January to June this year.

The invoicing rate for consultants was 78.2 % during the period (in June 79.2 %).

Growth in the Bioinformatics business area was 49 % during the period and profitability was good.

Growth in Industry was 28 %, while turnover in Telecom fell by 17 %.

The change in the market situation and the earnings trend have resulted in the implementation of an action programme in all profit centres. The main points of the action programme are:

- Organizational changes and new guidelines for thorough monitoring of all fixed-price projects.
- Cost savings and measures to increase efficiency.
- Intensified focus on proactive sales.

Completed product and concept developments in Telecom and thus increased competitiveness will impact the results in Q3.

Climbing the value chain

During the first half, investments continued to be made in concepts and solutions in the business areas and in the Customer Support profit centre. A total of SEK 3.2 million was invested and written off in internal development projects, in order to climb the value chain. In Telecom, SEK 1.1 million was invested in the development of Streaming in a box. In Bioinformatics, SEK 1.0 million was invested in the BioFrame development platform (see below), and the result was charged with SEK 1.1 million for the costs of the expansion of Customer Support operations.

The development projects in Telecom and Customer Support were completed and no further development expenditure is planned.

Öresund focus

Work on future start-up in Denmark and the focus on the Öresund region continued at unabated strength in Q2. The work is being carried out in cooperation with the Swedish Trade Council (Exportrådet). Together with a new office in Lund which opens in September (the Malmö office is being closed down), Prevas intends to establish itself as the leading IT consultant to the bioinformatics and life sciences market in this region too.

The focus on Denmark generated the first order for Prevas in July. An organization is expected to be in place in Denmark in October.

Prevas business areas

Bioinformatics

The business area aims to be regarded by its customers as an IT partner with broad experience of various biotech application areas. We therefore offer employees with broad experience of the sector, a number of whom have a molecular biology education combined with IT.

Bioinformatics continues to show strong growth and profitability. For continued expansion, it is necessary to expand outside the Stockholm-Uppsala region. During Q2, the focus was on the start-up in Denmark and the Öresund region, with thorough market research, marketing including initial customer contacts and the recruitment of management for the Danish operation. The first customer project will start on 20 August and we expect to have a local organization in place in October.

Development of the BioFrame platform continued. BioFrame comprises services based on Prevas' unique competence in IT solutions in biotech analysis and will shorten the lead time significantly for customers wanting to develop advanced bioinformatics IT solutions.

Negotiations are in progress with external partners for BioFrame's development.

Turnover in Bioinformatics was SEK 34.6 million (SEK 23.3 million) in the first half, up 49 %.

Industry

The business area's objective is to increase our industrial customers' competitiveness by delivering IT solutions of high delivery accuracy and quality in product development and production.

IT solutions for manufacturing industry were expansive during the first half.

- Operations for Shop Floor Control in Karlstad grew 54 % in Q2.
- New installations of BarTrack and TestNet for Ericsson's Long Island plant.

- New strategic installation of BarTrack for Solectron in Norrköping.
- SEK 3.3 million contract for the further development of TestNet.
- Administration and support contract for the data warehousing system SID.
- Flextronics placed a number of orders in connection with the signing of a strategic consultancy agreement.
- A maintenance system based on Palm Pilot and Intranet technology was delivered to Sandvik Steel.
- In cooperation with ABB, a number of orders in industrial IT were received, including production systems for delivery to Sandvik.
- A number of national/international orders in materials handling and stock management were received from the Volvo Group, Sandvik Coromant and ARLA.

IT solutions for embedded systems fell slightly in Q2. Sales staff was recruited for the autumn to counteract this. Important orders were received from ABB Robotics, Atlas Copco Assembly Systems, Bofors, Bombardier, Rolls-Royce and SAAB Dynamics Bofors.

Prevas Industry also began to focus on the new expansive area of mobile Internet solutions and telematics for industrial customers. Important pilot projects have already been commissioned and started.

During the year, framework agreements were signed with ABB, Atlas Copco, Bombardier, Flextronics, Sandvik and Westinghouse-ATOM.

Turnover in Industry was SEK 63.1 million (SEK 49.4 million) in the first half, up 28 %.

Telecom

The business area's vision is to be the leading consultancy company in streaming media for the telecoms market. We are currently working on system solutions in telecoms and next generation mobile systems.

During the period:

- Prevas developed and launched the product concept Streaming in a box in May. The product comprises services based on Prevas' unique competence in streaming media. The product shortens the lead time and reduces the costs significantly for customers wanting to start streaming media services, i.e. real-time sound and picture transmissions.
- Prevas signed a framework agreement with the Ericsson Group.
- Prevas signed a partnering agreement for the development and maintenance of "Nokia Open TV Platform Software".
- Prevas was given responsibility for an Ericsson base station project. Our office in Västerås was approved as an "Ericsson Design Office" with a direct communication link between the companies.

Customers include Ericsson, Nokia, Telia and Sveriges Television.

Turnover in Telecom was SEK 29.7 million (SEK 35.8 million) in the first half, down 17 %.

Other initiatives

e-security

The profit centre's objective is to increase its customers' business value by providing reasonable security solutions based on the trust requirement of the business.

For the second year running, Prevas was ranked one of the three leading suppliers of IT security in Sweden by the independent trade journal "Aktuell Säkerhet" (Current Security).

During Q2, Prevas e-security signed agreements with:

- The Gambro Group: two-year framework agreement for strategic e-security.
- The City of Stockholm: two-year framework agreement for IT security services.
- The Volvo Group: general consultancy agreement for strategic e-security.
- The Swedish Theft Prevention Association (Svenska Stöldskyddsföreningen): cooperation on security for the insurance industry.

Prevas e-security offers its customers the opportunity to communicate using secure e-mail in projects to protect corporate secrets from breaches in security.

Customer support

The profit centre's vision is to offer skilled support with high technical competence, where the customer always receives a rapid answer and personal treatment.

During the first half, a number of new support and administration agreements were signed with customers such as Arla, AstraZeneca, Pharmacia & Upjohn, Amersham Pharmacia Biotech, Sandvik and Personal Chemistry. The assignments are characterized by operation-critical applications, where short down times, preventive support and around-the-clock support are required.

Support commitments to both new and existing customers also increased in the product areas SFC and Prevas PharmaLine. The majority of these customers have operations wholly or partly outside Sweden.

During the first half, the support agreement with Whirlpool was also broadened and extended.

At the beginning of the year, a new case management system was brought into operation. The system is a very important tool for operations and for ensuring that the customer receives a rapid answer and is directed to the right group and employee. The system also makes it possible to follow up customer cases effectively and to provide statistics both to the customer and internally.

Finance

Tender outcome

Despite a deterioration in the market and thus increased competition, Prevas continues to have a stable customer base and a very high level of repeat business. During the first half, 96 % of orders went to Prevas and 4 % to a competitor.

Capacity utilization

The invoicing rate for the first half was 63.3 % (62.7 %), a slight increase compared with the previous period, but nevertheless not satisfactory. In Q2, the invoicing rate fell to 62.5 % (65.5 %). The invoicing rate – which is one of Prevas' performance indicators – is measured as the number of hours invoiced divided by the total hours used in the company. All employees including management and administration are included in the measurement.

Capacity utilization, i.e. solely measured for chargeable consultants, was 78.2 % for the first half.

Turnover per employee was SEK 445 thousand (SEK 455 thousand) during the period.

Assignment distribution

During the first half, 27 % (30 %) of assignments were charged on a fixed-price basis and 73 % (70 %) on a time basis.

Employees

The number of employees was 291 (285) at the end of the period. During the first half, 60 employees joined and 50 employees left the company. Staff turnover was mainly high in Gothenburg and Malmö. New management was appointed in both locations. During the period, the average number of employees was 290 (241).

Turnover and results

Turnover rose to SEK 129.0 million (SEK 109.6 million) in the first half, equivalent to 18 % growth. The number of working days was 123 (123). Operating profit was SEK 2.0 million (SEK 11.6 million) before goodwill amortization and operating loss was SEK 0.4 million (SEK +7.3 million) after this item. The operating margin was 1.6 % (10.6 %) before goodwill amortization and -0.3 % (6.6 %) after goodwill amortization.

Depreciation totalled SEK 4.9 million (SEK 4.5 million), of which SEK 2.4 million (SEK 2.4 million) related to goodwill amortization.

Net financial income/expense amounted to SEK 0.0 million (SEK -0.4 million). Loss after financial items was SEK 0.4 million (SEK +6.8 million), representing a profit margin of -0.3 % (6.2 %).

Net loss was SEK 1.0 million (SEK -0.1 million). Earnings per share after tax were SEK -0.13 (SEK -0.01 million). The period's high effective tax rate is mainly a consequence of non-deductible goodwill amortization.

An important factor behind the period's weak results is that the company made provisions of SEK 4.6 million for cost variances in some major fixed-price projects.

During the first half, the company also invested SEK 0.7 million in the future start-up in Denmark. In addition, SEK 2.1 million was invested in the further development of internal development projects. In the Telecom business area, SEK 1.1 million was invested in the development of Streaming in a box. In the Bioinformatics business area, SEK 1.0 million was invested in the BioFrame development platform. The half-yearly result was charged with SEK 1.1 million for the expansion of Customer Support operations.

Q2

Turnover for Q2 was SEK 61.1 million (SEK 57.9 million), up 6 %. The number of working days was 59 (59). Operating loss before goodwill amortization was SEK 4.2 million (SEK +4.4 million). Loss after financial items was SEK 5.4 million (SEK +4.5 million).

Profitability in Q2 was considerably worse than the company's expectations. The invoicing rate fell by 3 %, compared with the equivalent period the previous year. During the quarter, the company made provisions of SEK 3.1 million for cost variances in some major fixed-price projects. In addition, SEK 1.0 million was invested in the further development of the internal development projects Streaming in a box and BioFrame. The company invested SEK 0.4 million in the Denmark initiative. During the autumn, the Malmö office will relocate to Lund. A provision of SEK 0.4 million was therefore made for the remaining rental period in Malmö. During Q2, Prevas also held detailed negotiations on a major structural transaction. The negotiations were, however, concluded without an agreement being reached. The result for Q2 was charged with SEK 0.5 million for the costs of these negotiations. The quarter was also

charged with SEK 0.3 million for the costs of a staff option scheme launched in the spring.

The development projects in Telecom and Customer Support were completed and no further development expenditure is planned.

Financial position

Equity totalled SEK 85.4 million (SEK 84.5 million) at the end of the period, representing an equity/assets ratio of 62.9 % (53.8 %). The return on equity was -1.1 % (-0.01 %). Liquid assets totalled SEK 3.1 million (SEK 5.9 million) at the end of the period. Cash flow was positive in Q2. Liquid assets rose by SEK 1.2 million in Q2 compared with Q1, despite the repayment of interest-bearing loans of SEK 5.4 million in Q2. Cash flow for the first half was, however, negatively affected, mainly as a result of an increase in tax paid caused by the sale of Prevas Engineering, loan repayments and dividend payments.

Investments

During the first half, investments totalled SEK 4.3 million (SEK 5.1 million). All investments related to ordinary activities, and were for machinery and equipment.

Accounting policies

This interim report has been prepared in accordance with Recommendation RR 20 Interim reporting of the Swedish Financial Accounting Standards Council.

In other respects, the same accounting policies and calculation methods have been used as in the previous annual accounts. For further details please refer to the Annual Report 2000.

In August 1998, Prevas AB (parent company) took over all the shares in Trinova Software Systems AB (Trinova). On 1 January 1999, the parent company took over the entire operations of Trinova. In order to better reflect the earnings trend of the parent company, consolidated goodwill amortization has therefore been charged to the parent company's result. The result from participations in group companies and appropriations have not been taken into account, and the above full-year result for 2000 does not therefore correspond to that reported in the Annual Report.

Change	1 198	-16 968	2 300	-4 451

Detailed audit report

We have reviewed this interim report in accordance with the recommendation issued by the Swedish Institute of Authorized Public Accountants.

A review is very limited compared with an audit.

Nothing has been found to indicate that the interim report does not conform with the requirements of the Securities Exchanges Act and the Annual Accounts Act.
